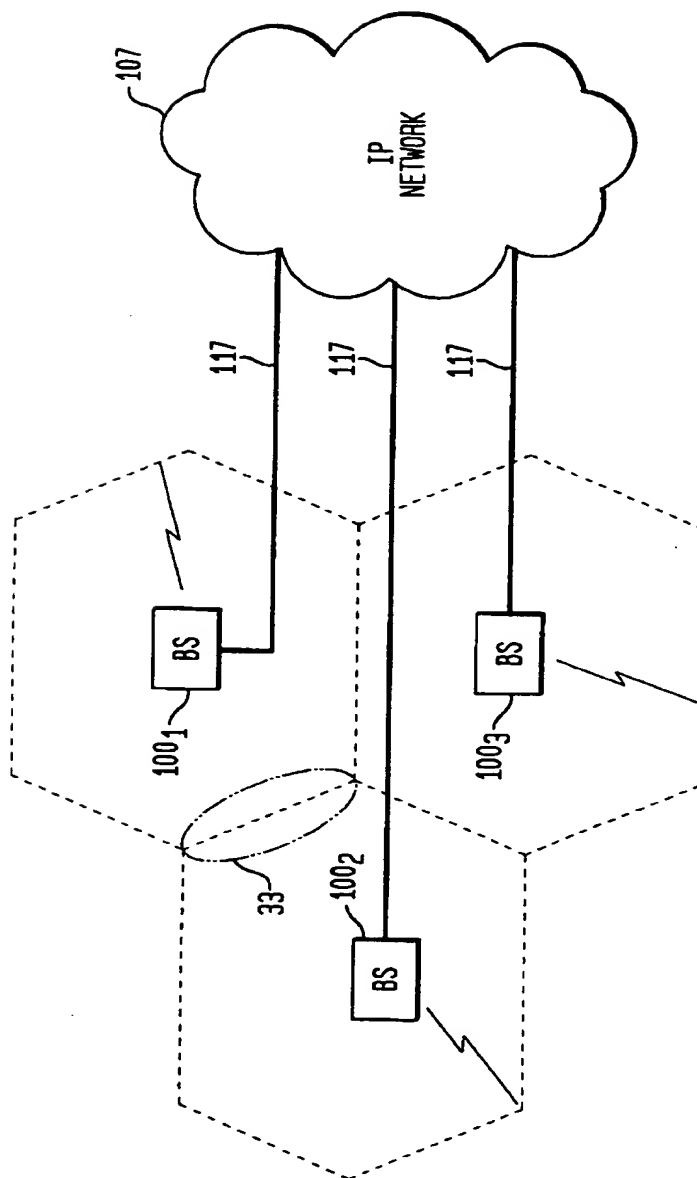

FIG. 2A

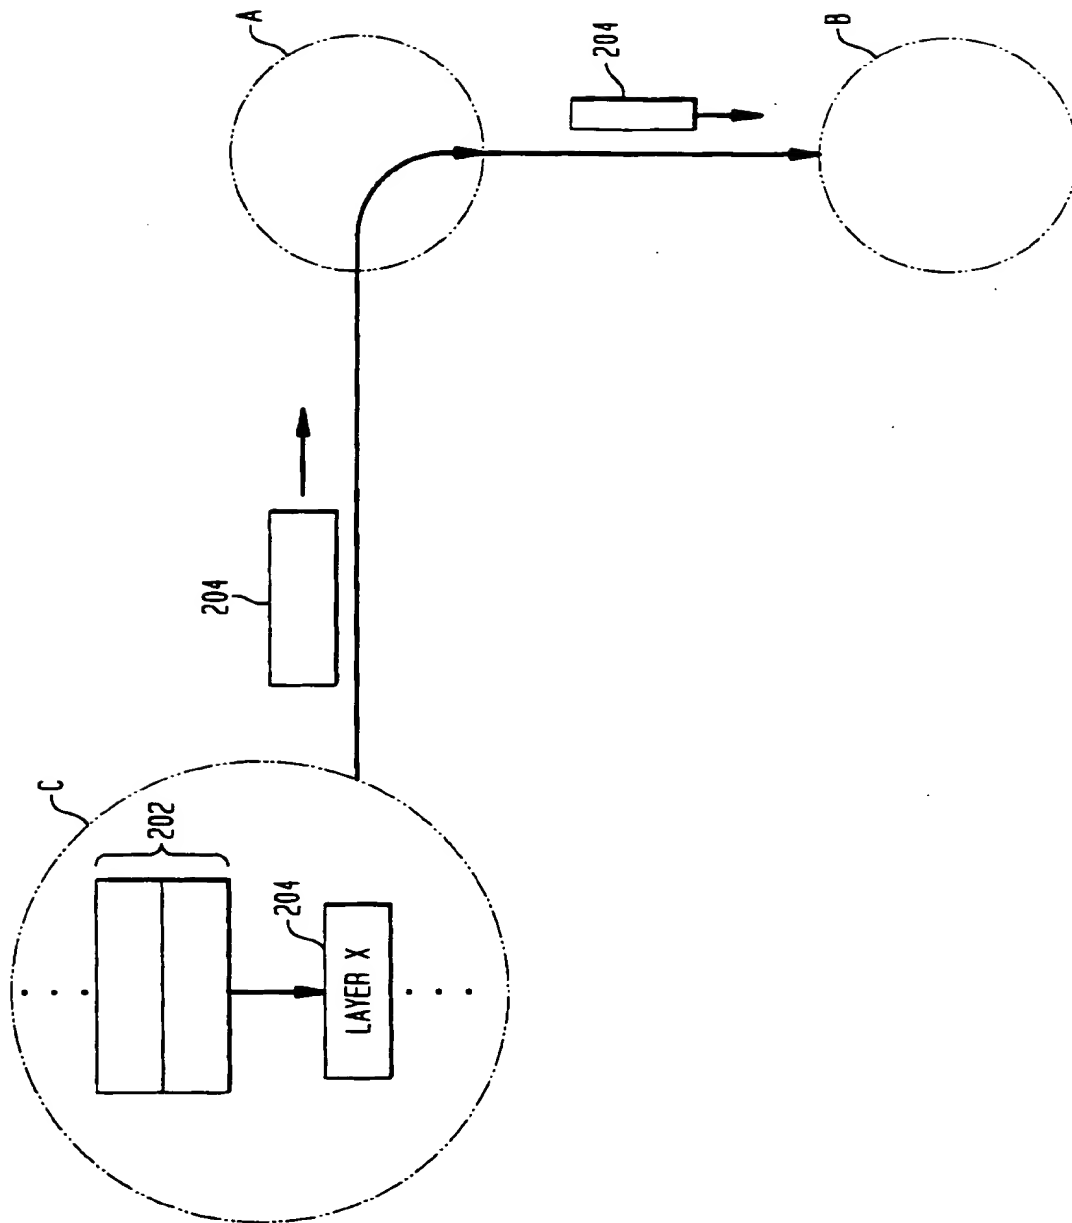

Figure 5 is a block diagram illustrating a network architecture. A mobile device (20) is shown within a dashed box, connected to a network (107) via a physical layer (212) and a remote layer processor (213). The network (107) is connected to a cloud (107) and a processor (217) via a physical layer (212c). The processor (217) is connected to a network (107) via a physical layer (212c). The network (107) is connected to a cloud (107) and a processor (217) via a physical layer (212c). The network (107) is connected to a cloud (107) and a processor (217) via a physical layer (212c).
